SUMMARY

Frontend Developer with 3+ years building and shipping enterprise CRM, ERP, and e-commerce platforms for businesses of every scale — from small dealer operations to multi-warehouse enterprises. Built 3 production CRM/ERP systems on React.js, Next.js, and TypeScript covering the full order lifecycle: enquiries, proforma invoicing, order management, inventory, warehouse operations, and dispatch. Owns frontend integration for e-commerce (Shopify), payments (Razorpay), and logistics/tracking (Porter, Bluedart, Shiprocket), plus AI-driven automation (OpenAI, Gemini, Perplexity, OCR, WhatsApp). Partners directly with backend engineering to ship real-time, WebSocket-driven interfaces used daily across multiple business units.

PROFESSIONAL EXPERIENCE

Frontend Developer (React.js / Next.js)

Partsklik LLP | Sep 2024 – Present | On-site

- Built and shipped **3 production-grade CRM/ERP platforms** (Partsklik, Kuber TurboTech, Partsklik Plus) covering the full order lifecycle — enquiries, proforma invoicing (PI), packing lists (PL), order management, inventory, warehouse, and dispatch — used daily across multiple business units, from **small dealer setups to multi-warehouse enterprise operations**.
- Built the frontend for a **multi-tenant retailer CRM for Kuber TurboTech** — a self-serve B2B ordering portal letting regional retail stores browse the catalog, place orders directly into the central Kuber CRM, and independently manage their own stock, customers, and orders, on a tenant-isolated backend.
- Owned the **e-commerce and payments frontend** — Shopify integration for multi-channel product listings and order sync across 2 stores, and Razorpay for payment processing — powering storefronts for both small and large-scale catalogs.
- Built **real-time logistics and tracking interfaces** integrating Porter, Bluedart, and Shiprocket for shipment booking, live tracking, and delivery-status visibility across the full fulfillment pipeline.
- Architected a **multi-location store management system** with role-based permissions and live search, and a **dispatch-aware sales engine** with tiered pricing and live stock validation — replacing manual spreadsheet operations and eliminating overselling.
- Drove **AI-powered automation** — OpenAI, Gemini, and Perplexity integrations, OCR-based document processing, and WhatsApp messaging workflows — cutting manual data entry and customer follow-up.
- Built a **barcode/QR scan-based warehouse workflow** with mobile-first interfaces for on-floor staff, **OTP-based authentication** with permission-gated routing, and real-time KPI dashboards for leadership visibility.
- Engineered **data synchronization across multiple internal CRM systems** plus a self-hosted **Synology NAS** integration for centralized file management — partnering closely with backend engineering on REST- and WebSocket-driven architecture end to end.
- Key Impact:** Shipped the frontend for 4 CRM/ERP & B2B platforms — 3 internal CRMs plus a multi-tenant retailer ordering portal — 2 Shopify stores, end-to-end logistics tracking (Porter, Bluedart, Shiprocket), and AI-driven automation, powering daily operations for businesses ranging from small dealer setups to multi-warehouse enterprises.

Frontend Developer

DigiIndia Solutions | Sep 2023 – Sep 2024 | On-site

- Delivered **35+ responsive, SEO-friendly websites** across healthcare, e-commerce, and education industries using React.js, HTML, CSS, Bootstrap, and Tailwind CSS.
- Built **dynamic dashboards and role-based systems** for real-time business applications, collaborating with cross-functional teams on API integration, usability, and performance.

SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap, Material UI (MUI)

State & Data: Redux / Context API, Axios

Domain: CRM & ERP Development, Order & Inventory Management, Warehouse Management, Multi-tenant Business Platforms, Business Automation

E-commerce & Payments: Shopify API, Razorpay

Logistics & Tracking: Porter API, Bluedart API, Shiprocket API

AI & Automation: OpenAI API, Google Gemini API, Perplexity API, OCR Integration, WhatsApp Automation

Tools & Backend: Git, GitHub, Recharts, Postman, MySQL, MongoDB, Django, Synology NAS

EDUCATION

Master of Computer Applications (MCA) — In Progress

Lovely Professional University (LPU) | 2026 – Present

Bachelor of Computer Applications (BCA)

IGNOU University, Delhi | Jan 2022 – Jul 2025
