

Harshvardhan Mishra

Frontend Developer — React.js & Next.js | Enterprise CRM, ERP & E-Commerce Platforms

Delhi, India | 8368035050 | mharshvardhan40@gmail.com | [linkedin.com/in/harshvardhan-mishra07](https://www.linkedin.com/in/harshvardhan-mishra07) | github.com/HARSH-VARDHAN-MISHRA

SUMMARY

Frontend Developer with 3 years of experience architecting enterprise-grade business platforms on React.js and Next.js. Leads frontend development for large, multi-module systems spanning order management, inventory, warehouse and dispatch operations, e-commerce integrations (Shopify, Porter), OCR-based document processing, and AI-driven automation. Works closely with backend engineering to design real-time, API-driven interfaces that scale across multiple sales channels.

PROFESSIONAL EXPERIENCE

Frontend Developer (React.js / Next.js)

Partsklik LLP | Sep 2024 – Present | On-site

- Lead frontend architecture for three enterprise-grade business automation platforms built on **React.js and Next.js**, spanning order management, inventory, warehouse operations, and dispatch — used daily across multiple business units.
- Architected a multi-location store management system with **role-based access control** and real-time search, replacing manual, spreadsheet-based operations for the business.
- Designed a dispatch-aware sales engine with **tiered pricing logic** and **live stock validation**, eliminating overselling and pricing errors during high-volume order cycles.
- Integrated **Shopify APIs** for product listings and multi-channel order sync, and **Porter's logistics API** for real-time delivery dispatch, vehicle allocation, and fare estimation.
- Built **OTP-based authentication** with permission-gated routing, and **real-time analytics dashboards** with live KPI visualizations giving leadership visibility into sales, inventory, and dispatch performance.
- Implemented **OCR-based document processing** and **AI-driven automation workflows** that cut manual data entry across the platform.
- Built responsive, **mobile-first interfaces** for warehouse and barcode-driven workflows, improving usability for on-floor operations staff.
- Partner closely with backend engineering to design scalable **REST- and WebSocket-driven interfaces** that ship end-to-end without hand-offs.

Frontend Developer

DigiIndia Solutions | Sep 2023 – Sep 2024 | On-site

- Delivered **35+ responsive, SEO-friendly websites** across healthcare, e-commerce, and education industries using **React.js, HTML, CSS, Bootstrap, and Tailwind CSS**.
- Built **dynamic dashboards** and **role-based systems** for real-time business applications, contributing to scalable frontend experiences.
- Collaborated with cross-functional teams to integrate APIs and improve platform usability and performance.
- Maintained clean, reusable, scalable code following modern frontend practices, using **Git/GitHub** for version control.
